

How J2e can help support embedding DCF into classroom practice.

Course objectives

- To become familiar with the J2e tools and how they are used to support Computing Unlocked and the DCF
- To become confident in using j2data and j2code within the Foundation Phase
- To set up and manage classes within the J2e software through Hwb

Phase - Foundation Phase

Audience – Foundation Phase Teachers and support staff

Course date – 28/11/2017.

Course length – Morning session 9.15 – 12.15

Course cost - £50

Venue – Ysgol Bro Eder, Cardiff

***Additional information**

Please bring your Hwb log in details with you to the course

This half day course is specifically for developing the use of cloud based technologies to support the DCF in the Foundation Phase. Practitioners will receive an overview of the J2e suite of software which is freely available through Hwb. They will be taught the skills necessary to embed the use of J2e in the classroom. Particular emphasis will be placed upon j2data and j2code. Through using these technologies schools are able to address most aspects of the DCF and many activities related to Computing Unlocked.
